NEW FOR

NEW BULLETS!

270 Caliber 150 Grain Hybrid Target Bullets

The new Berger 270 caliber 150 grain Hybrid Target bullet is developed with the modern 6.8 Western and 277 Fury cartridges in mind and will also turn your classic 270 cartridge into an absolute tack-driver. The new 270 cal 150 grain features the superbly designed Hybrid Target profile and the tightest tolerances in the industry with our legendary Berger J4 Jackets - less than 0.0003" of total indicated runout. Expect an exceptional G1/G7 BC of .580/.297 with less than 1% variance. That means less guessing and more rounds on target. We've optimized the design for 1:9" twist rate, which are sure to be a winning choice for your 270 Winchester, 270 WSM, 27 Nosler and 270 Weatherby.

Part # 27401
Berger 270 Caliber 150 Grain Hybrid Target

AVAILABLE THIS SUMMER

30 Caliber 217 Grain Elite Hunter Bullets

The 30 Caliber 217 Grain Elite Hunter offers a heavy-for-caliber bullet solution for today's modern long-range hunting platforms, maximizing both energy and terminal performance. Elite Hunter projectiles utilize Berger's industry-leading hybrid ogive profile, blending tangent and secant designs to optimize efficiency, reduce wind-drift, and minimize sensitivity to seating depth.

Like all Elite Hunter's, the new 30 caliber 217 Grain provides 2-3" of penetration before producing extreme hydrostatic shock and a massive wound cavity through the vitals. Energy is delivered where most effective – inside your harvest. The 217 Grain Elite Hunter features an ultra-high ballistic coefficient (BC = 0.695) delivering unmatched precision with the highest energy upon impact.

Part # 30551
Berger 30 Caliber 217 Grain Elite Hunter

AVAILABLE THIS FALL

2025 NEW AMMUNITION!

300 Norma Magnum 245 Grain Long Range Hybrid Target

Berger's 300 Norma Magnum 245 Grain Long Range Hybrid Target (LRHT) ammunition provides Extreme Long Range (ELR) enthusiasts with the heaviest-in-class projectile and highest downrange performance. Berger's 245 Grain LRHT bullet delivers a G7 BC of 0.433 and BC standard deviation of less than 1%, which offers you unmatched consistency and downrange ballistics necessary to engage targets beyond 1,500 meters. All Berger 300 Norma Magnum ammunition is loaded with Lapua Cases and Vihtavuori powder.

AVAILABLE NOW

338 Norma Magnum 300 Grain Hybrid OTM Tactical

The 338 Norma Magnum cartridge was designed specifically to optimize long, sleek, high-performance projectiles such as the industry's finest Berger 300 Grain Hybrid OTM Tactical. The 300 Grain Hybrid OTM Tactical has no rival with BC consistency, precision, and hit percentage when firing to extreme distances, IE: beyond 1,500 meters. Berger 338 Norma ammunition is loaded exclusively with Lapua cartridge cases and Vihtavuori propellant, both recognized as the top components for long-range competition shooters and precision reloading enthusiasts.

AVAILABLE THIS SPRING

300 WSM Hunting Ammunition

Sought after by precision shooters and long-range hunters alike, the 300 WSM offers similar energy, velocity, and terminal performance to the 300 Winchester Magnum, packaged in a lightweight short-action platform. Berger 300 WSM Hunting ammunition is loaded with your choice of either the 185 Grain Classic Hybrid Hunter, or the industry's heaviest-in-class 205 Grain Elite Hunter. Berger 300 WSM ammunition features the highest quality construction and components – loaded with Lapua Cartridge Cases and powered with Vihtavuori powder.

AVAILABLE THIS FALL

30-06 Springfield Hunting Ammunition

New Berger 30-06 Springfield ammunition provides a premium solution for skilled hunters demanding an ethical harvest. Berger Classic Hybrid Hunter projectiles provide 2-3" of penetration before producing extreme hydrostatic shock and a massive wound cavity through the vitals. Energy is delivered where most effective – inside the animal. New 30-06 Springfield cartridges are loaded into Lapua cases with 168 Grain or 185 Grain Classic Hybrid Hunter bullets and powered by Vihtavuori propellants.

AVAILABLE THIS SUMMER

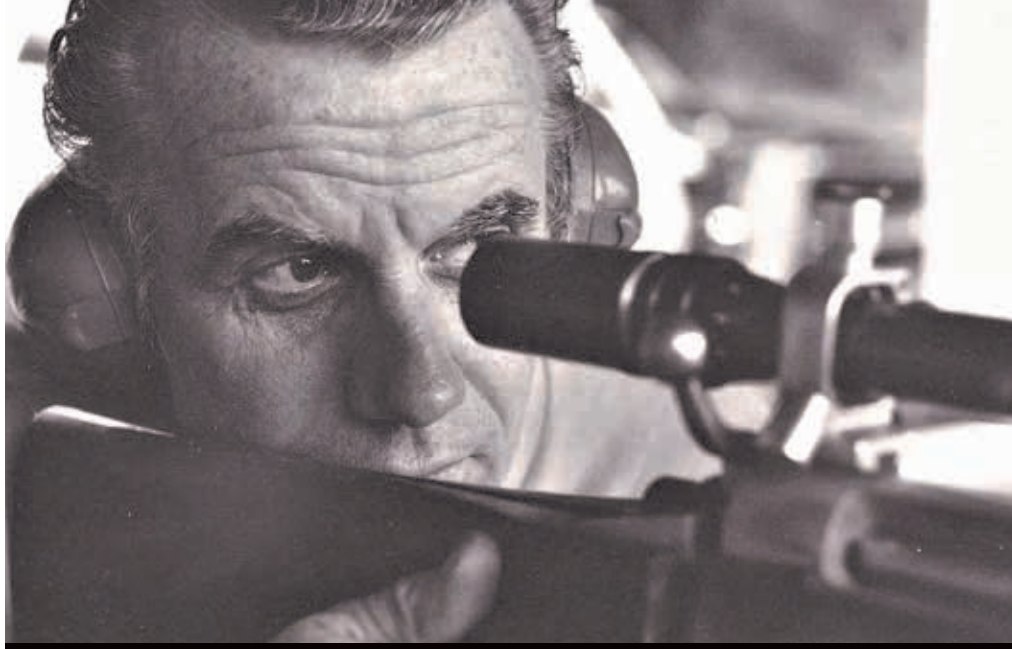
2025 – A YEAR FOR CONTINUED INVESTMENT AND SUCCESS

Berger Bullets and Ammunition experienced another year of tremendous growth in 2024! Thank you to all our loyal customers who have made Berger Bullets and Ammunition the #1 choice of competitive rifle shooters, long-range hunters, and our nation's elite operators.

We have more than doubled our manufacturing capacity in just a few short years, yet are still experiencing demand challenges throughout the world. We hear you! For 2025, we'll continue to invest in our people, our innovative technology, and increased production capacity while maintaining the world's highest quality products and service. Of course, producing the best products will always be our #1 priority. Quality over quantity is absolutely necessary for our demanding customers!

Walt Berger's motto, "If a job is worth doing, it's worth doing right," continues to resonate with every experienced manufacturing team member. They apply it to each and every production run of bullets and ammunition, striving to not only maintain the highest quality standard within the industry, but exceed it. Plus, it's nurtured into each and every new team member's work ethic through Walt's grandson, David Hamilton, our Berger Plant Manager.

We hope to see you on the firing line and in the field in 2025!



"IF A JOB IS WORTH DOING, THEN IT'S WORTH DOING RIGHT."

WALT BERGER
FOUNDER

A BETTER BULLET BEGINS WITH A BETTER JACKET

A better bullet begins with a better jacket. Berger's J4 Precision Bullet Jackets are world-renowned for having unmatched concentricity, with each production lot measuring +/-.0003" Total Indicated Runout (TIR). This concentricity is achieved by using the highest quality raw copper, advanced tooling and cutting-edge manufacturing techniques focusing solely on consistency and repeatability – not speed and volume. No other bullet manufacturer in the world is able to replicate these unprecedented results. All Berger Bullets are manufactured using J4 jackets. J4 is an essential ingredient to produce the most accurate and consistent bullets in the world. Berger's J4 jacket continues to be the #1 choice of custom bullet makers and has compiled countless world records in a variety of shooting disciplines such as Benchrest, High Power, Long Range, F-Class, ELR, PRS and more. The pinnacle of long-range precision may only be reached with Berger's J4 Jacket.

LONG RANGE HYBRID TARGET

- Meplat Reduction Technology™ produces the most repeatable bullet profile
- Industry’s most consistent BC’s
- Doppler verified, unmatched SD’s

Long Range Hybrid Target Bullets feature an improved center of gravity and increased BC. Our Meplat Reduction Technology™ (MRT) System applies controlled pressure along the nose improving shot-to-shot consistency and ballistics down range.

VLD TARGET

VLD TARGET

- Long secant ogive produces higher BC's
- Shoots flatter and is less affected by wind
- Reduced drag = higher retained velocity
- Boat Tail for transonic flight stability

EXTREME LONG RANGE (ELR) MATCH

- Optimized for ELR and Specialty Mil/LE applications
- Meticulous manufacturing techniques
- Secant (VLD) ogive design for highest BC

Berger Hybrid Target Bullets blend the best aspects of tangent and secant ogives into one nose shape. It starts at the bearing surface with a tangent ogive that aligns itself when the bullet contacts the rifling. Then it transitions to a secant ogive, proven to be least influenced by wind, with its reduced drag properties. The result is a high BC bullet that is easy to load and shoot.

Berger Tactical Bullets are trusted by our military’s elite forces for being the most accurate, dependable and deadly projectiles commercially available today. Berger Tactical Bullets are designed to bridge the gap between flawless functionality and the highest possible ballistic performance.

All Berger Bullets are built with J4 Precision Target Bullet jackets, allowing them to perform reliably under the most abusive conditions found in competition shooting, combat and tactical situations. Tactical bullets will produce exceptional results at either magazine-fed lengths or single shot situations which allow for more powder capacity and higher velocities. All Berger Tactical Bullets are built with the same machinery, tooling, materials and tolerances used to produce our record-setting, match grade target bullets.

Flat Base (FB) bullets are the staple for short-range precision shooters and it's where Berger had its humble beginnings. Many of Berger's flat base, tangent ogive bullets continue to win benchrest matches in group and score shooting disciplines globally. Competitors choose to Shoot Better with Berger, or lose to a Berger!

FLAT BASE

- Highest accuracy at short ranges
- Capable of sub ¼ MOA groups
- Easy-to-tune tangent ogive design
- Exceptional performer in any rifle

Boat Tail (BT) bullets are easy to tune and provide a slight advantage in the wind for long-range capability. Long Range Boat Tail bullets lengthen the ogive for an increased Ballistic Coefficient (BC), and are most successful when seated to a longer than standard cartridge overall length (COAL).

BOAT TAIL

- Highest accuracy at mid-to-long range
- Easy-to-tune tangent ogive design
- Exceptional performance when matched to your specific rifle chamber dimensions

ELITE HUNTER

- Built with a long hybrid ogive for hunters seeking the highest ballistic coefficient for long range hunting
- Designed for custom firearms with extended magazines for long range rounds loaded longer than SAAMI or CIP
- Hybrid ogive provides less sensitivity to seating depth making the Elite Hunter easy to load and tune accurately

CLASSIC HYBRID HUNTER

- Innovative hybrid ogive design provides hunters the highest ballistic performance for their factory rifle
- Purpose-built to easily feed through factory magazines adhering to SAAMI and CIP overall cartridge lengths
- Unique profile allows flawless magazine functioning with the best possible down range ballistics

VARMINT BULLETS

Berger Varmint Bullets are used by hunters and accuracy enthusiasts who demand the highest level of performance for their small game needs. Berger Varmint Bullets are built with the same machinery, tooling, materials and tolerances used to produce all of our industry-leading competition target bullets. That includes the use of Berger J4 Precision jackets as well. Each J4 jacket measures +/- .0003" TIR and is the foundation for which all precision projectiles are built.

Berger Varmint Bullets are purpose-built with a thinner jacket at the meplat, which produces a bullet tip that expands quickly. This achieves the results varmint hunters desire for their predator applications.

Berger Match Grade Target Ammunition is built for the serious competitive shooter who prefers spending all available free time on the range or firing line mastering their craft – instead of being holed-up in a musty basement, quarantined from the real world. We remove the guesswork and meticulously assemble each cartridge with the same great care that's used to build the world's most accurate Berger Target bullets. Every cartridge is assembled with the finest machinery, tooling and premium components producing unmatched accuracy, reliability and long-range performance. You'll experience sub-MOA accuracy, low standard deviations and extreme spreads that rival premium handloads. Why waste invaluable range time when you can open up a box of Berger ammunition and experience the performance of precision handloads "off the shelf".

HUNTING AMMO

Berger Match Grade Hunting Ammunition is carefully crafted to reliably bring down trophy-sized game with lethal precision. When accuracy, functionality and performance are absolutely imperative, Berger Hunting Ammunition repeatedly delivers concise and ethical results. Its foundation is built upon the world's most accurate hunting projectiles, each carefully paired with a proven hunting cartridge to maximize performance while in the field. We then assemble each cartridge using highly sought-after premium casings and extreme temperature stable propellants utilizing the industry's most innovative loading techniques. A premium-grade hunting recipe built for outdoor success.

All Berger Hunting cartridges utilize hybrid ogive projectiles that provide the highest ballistic performance at long ranges, flawless magazine functioning and unrivaled shot-to-shot consistency. Muzzle Velocity and Energy are tuned for peak performance and retained energy upon impact.

Berger Match Grade Tactical Ammunition provides competitive shooters, Mil/LE warfighters, operators, and members of our Elite Forces the reliability that's absolutely necessary to get the mission accomplished and complete the task at hand.

Berger's Tactical ammunition offerings have gone from concept to commercial development by partnering with our military's most elite operators and listening to their unique needs. Prototypes are first meticulously hand-crafted for special-application platforms. Once proven successful, we introduced each of these offerings to the commercial market for the competitive shooter, operator and accuracy-minded rifle enthusiast. Experience the success that only Berger Tactical Ammunition is able to deliver. Assembled with the highest quality components and tested in the most extreme weather conditions, Berger Ammunition will reliably deliver world-record performance on the firing line or battle field. **Shoot Better** with Berger Tactical Ammunition.

PERFORMANCE METRICS

SD: Sectional Density, an indicator of penetration.

G1 BC: The Ballistic Coefficient referenced to the G1 standard. Use this BC for flat base bullets.

G7 BC: The Ballistic Coefficient referenced to the G7 standard. Use this BC for boat tail bullets.

G7 Form Factor: The drag of the bullet compared to the G7 standard. Lower form factor means lower drag. Form factors close to 1.0 are average. Bullets with form factors below 1.0 will have high BCs for their weight, and will perform better at long range.

Minimum Twist: Minimum twist will enable you to shoot good groups but you may experience a compromise in ballistic coefficient (BC) performance. Use the Berger Twist Rate Calculator to determine the twist rate that works best for your bullet selection at bergerbullets.com/twist-rate-calculator/

BULLET DIMENSION REFERENCE

Bullet Diameter: This is the bullet caliber.

OAL: Overall Length.

Boat Tail: Length of the boat tail, excluding the heal.

Nose Length: From the front of bearing surface to the bullet tip.

Base To Ogive: From the bullet base to the point on the nose which contacts the riflings at the bore diameter.

Bearing Surface: Length of the full diameter portion of the bullet.
