

# Test shooting ASR 90 accessories

The test day will take place on the following date:

**December 14th 09.00-17.00 Brünig Indoor**

As the request for December 14 is the highest, we would like to schedule all interested parties on this day. However, we will be offering further test shoots in spring 2025, as we are planning to hold them in outdoor ranges as the lighting is better than in the Brünig Indoor.

## **What is on offer?**

We will show you how to mount it and provide you with a Stgw 90 for a non-binding test shoot to experience the new sights directly in live fire.

## **What is needed on the test days at Brünig Indoor?**

Participation is free of charge. Ammunition must be provided by the shooter, or can be purchased on site.

## **What is your advantage?**

We advise interested parties on the details of the new visor variants.

We also explain whether and which existing visor parts can continue to be used or can be replaced. If you are interested in buying one, we will provide you with a list of items that you can order from your personal gunsmith or dealer, from us tailored to your needs.

## **How much time do I need to allow?**

The shooting time is 30 minutes. Ideally, you should arrive approx. 30 minutes before the start of shooting so that we can briefly explain the new accessories to you. We provide the Stgw 90. You only need to take the ammunition with you.

# Registration

14. December 2024 09.00 - 17.00 Uhr
