Premium Sights for Stgw 57

The premium sighting system, which has already proven itself on the Stgw 90, is now also available for the Stgw 57. The diopter plate is now aligned with the sight line in all axes. The front sight mount allows for quick and flexible replacement of the front sight, which can be quickly removed for protection. Thermal locks for all common barrel manufacturers are included in the scope of delivery.

and thermal barriers

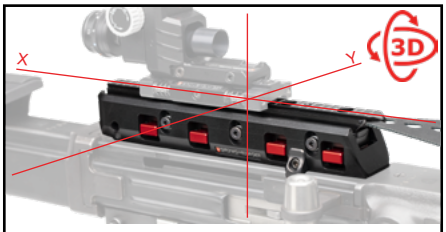

Premium Complete:
Art. No. 14.9810 **CHF 827.-**
G+E Stgw 57 Premium Diopter Plate + Front Sight
Mount with Quick-Change Plate, including a flashing strip,
front sight mount protector and thermal barriers

Advantages of the G+E System

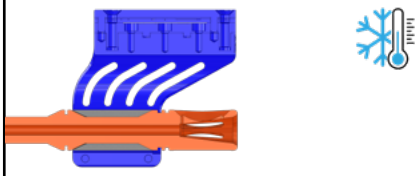

Diopter Rail:
The widest range of diopter adjustment on the market. Ideal eye relief.

Independent of color filters, iris diaphragm, or diopter.

Aligned:
The diopter rail is now perfectly aligned with the barrel axis. The benefits of the proven premium system for the Stgw 90 are now available for the Stgw 57 as well.

Thermal Barrier:
The bullet carrier is now thermally isolated from the barrel and its heat.
Thermal barriers are available for all common barrel brands.

It is now also possible to quickly change the ring sight.
The quick-change plate is identical and therefore compatible with the Stgw 90‘s Premium system.

The tunnel can now be adjusted for length on the front sight post.

Compatible with all M18 front sights.
